

HOW TO VIEW VIDEO'S BY CONNECTING YOUR IPAD OR LAPTOP TO YOUR TV

What is needed:

- HDMI cable – please make sure it is long enough to reach from your TV to where you sit with your iPad or laptop.

(b)

- USB-C Display AV to HDMI Adapter
- Adaptor to plug into your iPad to give you a USB-C port

(a)

Connecting an iPad using the Lightning (charging) port

1. Plug a Lightning Digital AV Adapter (a) into the charging port on the bottom of your iPad
2. Connect an HDMI cable into your USB-C adapter (b)
3. Connect the other end of your HDMI cable to your TV
4. On your TV handset, tap 'Source' to switch to the correct video source on your TV. If you need help, use your display's manual.

Connecting a laptop to TV using HDMI

- Buy a HDMI cable – make sure it is long enough to reach from your laptop to the TV
- If your laptop has HDMI port, plug in with an HDMI cable
- If your laptop does not have a HDMI port, you will need to buy an HDMI to USB-C adapter (most new laptops come with a USB-C port).

FOR APPLE MAC LAPTOPS:

- You will need to buy a Mini DisplayPort to HDMI adapter
 - This plugs in to the Mini Display Port on the laptop, usually on the right side of the laptop
